Yemen: Hunger, Another War Wound.

Fatima has nine children. In order to provide for them, she makes a living from fishing. Although her village was devastated by armed conflict in Yemen, Fatima returned to resume her livelihood, buying a boat with money she earned from selling fish. The conflict—between Houthi Shia Muslim rebels and a Sunni Arab coalition led by Saudi Arabia—dates from 2014, and has led to what UNICEF has termed the world's largest humanitarian crisis. Some 20.1 million people (almost two-thirds of the population) required food assistance at the beginning of 2020, with approximately 80 percent of the population relying on humanitarian aid. A Saudi coalition blockade on Yemen between 2015 and 2017 imposed import restrictions on food, medicines, and fuel. Resulting shortages exacerbated the humanitarian crisis. In many cases, conditions of near-famine were caused not so much by the unavailability of food, but because it became unaffordable, priced out of reach to most Yemenis by import restrictions, soaring transport costs due to fuel scarcity, a collapsing currency, and other man-made supply disruptions. In 2020 conflict intensified, and the situation was made worse by unprecedented heavy rainfall, which made some 300,000 people homeless, locust infestations that destroyed crops, and the effects of the COVID-19 pandemic.

About
Pablo Tosco
Argentina
Pablo Tosco is an Argentinian photo-video journalist focused on telling the stories of silenced people.
His work is focused on documenting and the inequalities and tragedies caused by migration and exodus, the migratory route of sub-Saharan people seeking a future in Europe, and the Syrian and Iraqi conflict and its impact on neighboring countries such as Jordan, Turkey, and Lebanon.

Sierra Leone
Tosco's work has been published by El País, El Mundo, La Vanguardia, Clarín, BBC, TVE, Al Jazeera, CNN, The Guardian, The Washington Post, The New Yorker and The New York Times.

Yemen: Hunger, Another War Wound.

The conflict—between Houthi Shia Muslim rebels and a Saudi Arab coalition led by Saudi Arabia—dates from 2014, and has led to what UNICEF has termed the world's largest humanitarian crisis. Some 20.1 million people (almost two-thirds of the population) required food assistance at the beginning of 2020, with approximately 80 percent of the population relying on humanitarian aid. A Saudi coalition blockade on Yemen between 2015 and 2017 imposed import restrictions on food, medicines, and fuel. Resulting shortages exacerbated the humanitarian crisis. In many cases, conditions of near-famine were caused not so much by the unavailability of food, but because it became unaffordable, priced out of reach to most Yemenis by import restrictions, soaring transport costs due to fuel scarcity, a collapsing currency, and other man-made supply disruptions. In 2020 conflict intensified, and the situation was made worse by unprecedented heavy rainfall, which made some 300,000 people homeless, locust infestations that destroyed crops, and the effects of the COVID-19 pandemic.

Tolerance.

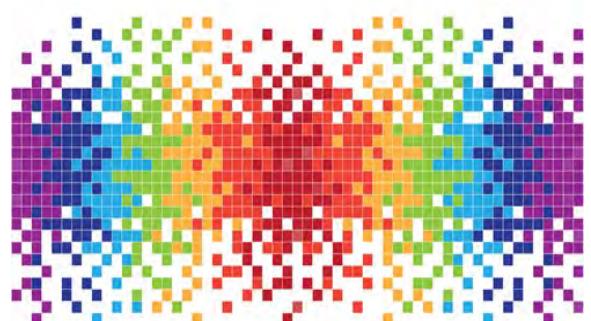

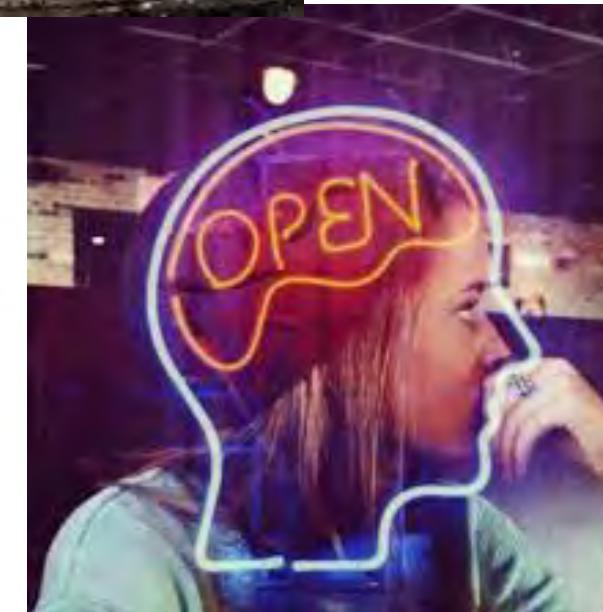

forbearance, sympathy, understanding, charity, lenience.

Tolerance

- liberalism
- patience
- toleration
- strength
- open-mindedness
- inclusiveness
- equity

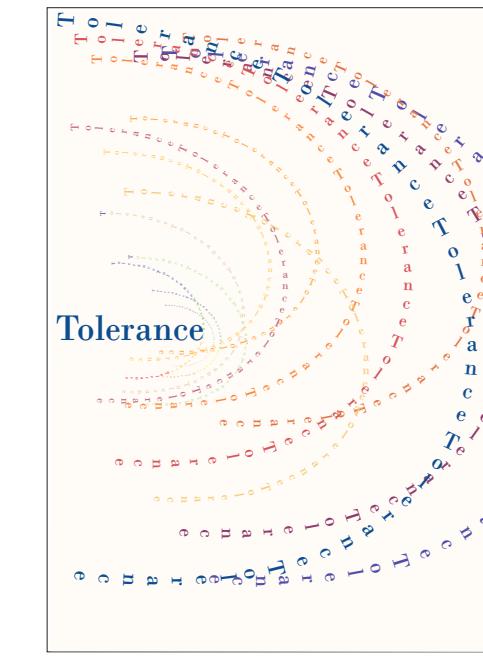

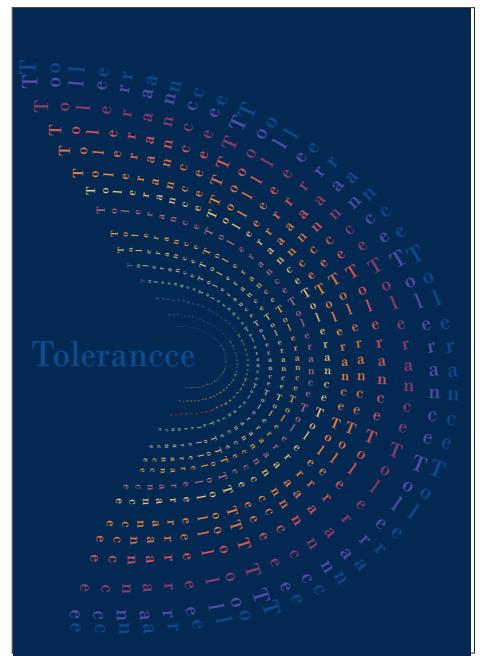

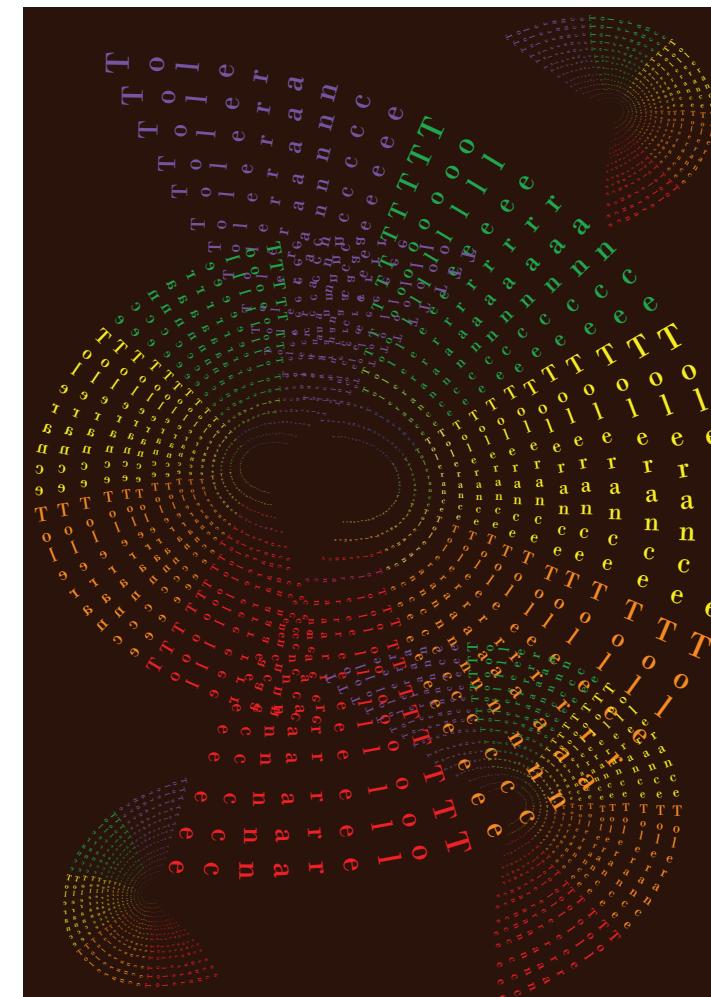

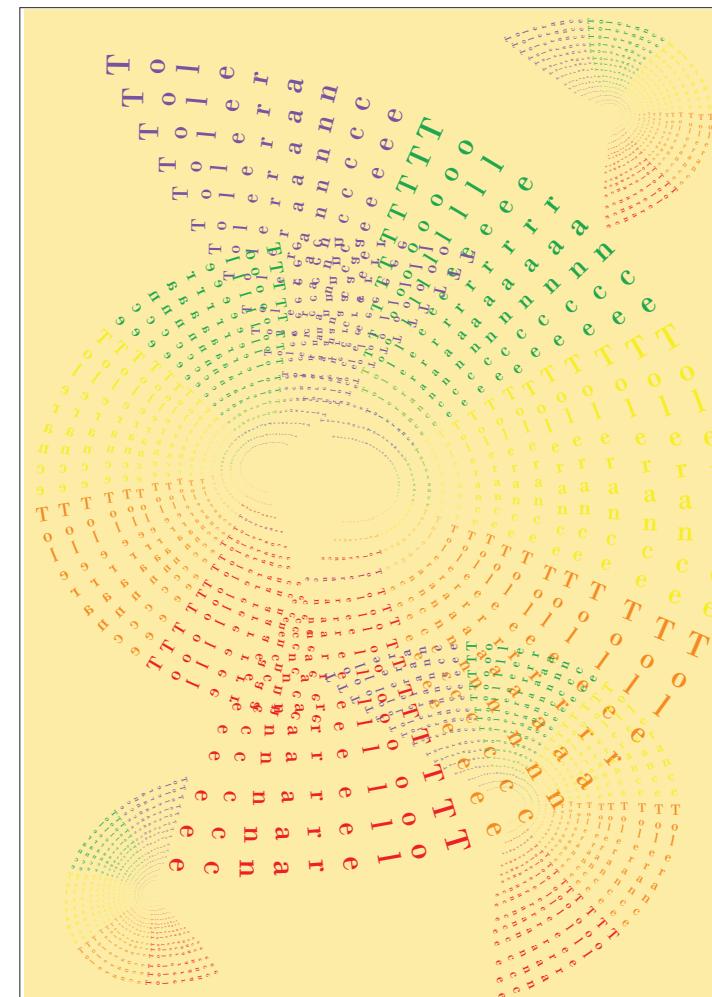

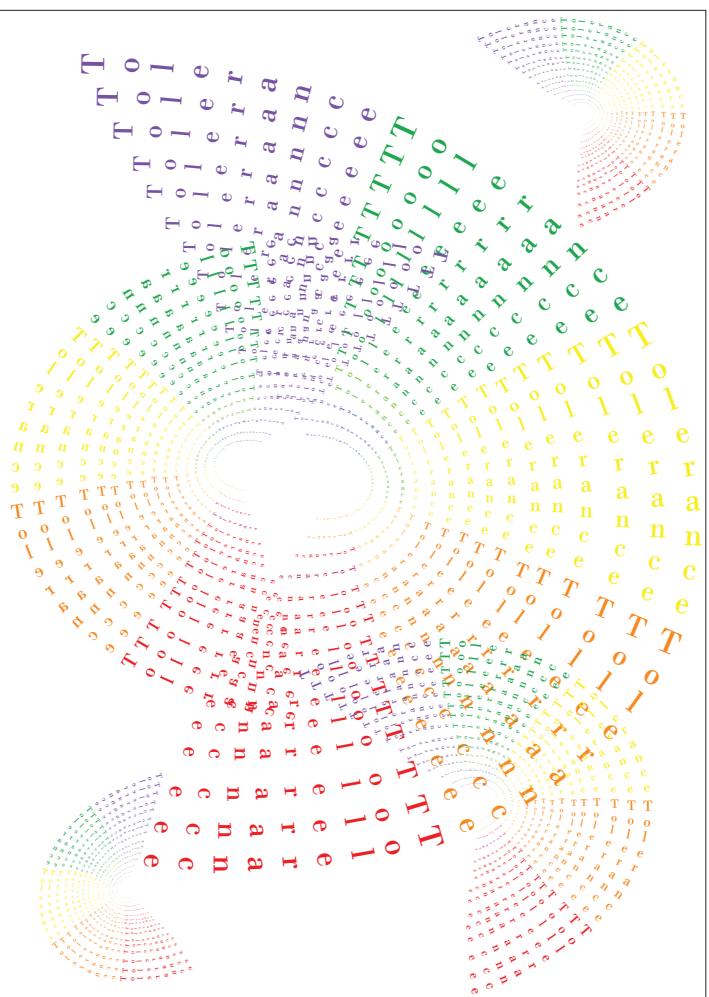

Tolerance is a personality trait. It reflects an attitude of liberalism, an acceptance of the behavior, beliefs and values of other. It is a term that is associated with psychological resilience which arises from the ability to tolerate stress of various forms without negative consequences.

Tolerance means to be able to understand, to accept something different, which could be an opinion or behavior that one does not necessarily one has to agree. In a world filled with other cultures, nations, races, and religions, tolerance sometimes has different levels and meanings. Koi fish is a symbol of connection with family. Specific koi colors represent each family member, and they are symbolic of solidarity, harmony, and unity. I used this symbolism to represent different nations and people in the world; using different colors, I wanted to show their individuality and float together as a unity.
